PRODUCT DESCRIPTION
CorShield® VpCl™ Strippable Coating is a water-based, non-flammable temporary coating that can be easily removed without the use of paint strippers or cleaners. The unique combination of water-based acrylic polymers, Vapor phase Corrosion Inhibitors (VpCl™s) and a thixotropic thickeners provides excellent barrier, surface and corrosion protection. CorShield® VpCl™ Strippable Coating is ideally suited for use on bare metal, painted surfaces, and in applications where surface protection and corrosion inhibition are necessary.

Designed for use as a fast-drying, temporary coating for parts and equipment, CorShield® VpCl™ Strippable Coating is resistant to sagging and running while remaining non-flammable and environmentally friendly. CorShield® VpCl™ Strippable Coating is a clear coating that can be tinted in a variety of custom colors.

SUGGESTED USES
• Protection of clean metal surfaces for storage or shipment
• Protection of painted surfaces from physical damage during storage or shipping

FEATURES
• Does not leave residual contamination
• Water-based, non-flammable
• Near zero VOC, contains no co-solvent
• Prevents corrosion/oxidation of metals
• Provides multimetal protection
• Temporary coatings for any outdoor conditions
• Fast drying
• Nice smooth appearance
• Available in different colors
• Ease of application and clean-up
• Requires no solvent or paint removers
• Simple to dispose off as a solid waste

LIMITATIONS
Since strippability depends on application conditions and the type of surface to be protected, testing may be required prior to use.
• Use 2 coats on porous surfaces
• Use 2 coats for medium to long term outdoor protection

TYPICAL APPLICATION
CorShield® VpCl™ Strippable Coating is supplied as a milky liquid which can be applied by spray, brush, roll or dip. Applications include:
• Automotive body and frame
• Steel sheets
• Small parts
• Transit coatings
CorShield® VpCl™ Strippable Coating can be used in one or two coats. To achieve good strippability, the recommended thickness per coat should not be less than 2-mils (50 microns).
METALS PROTECTED
- Carbon steel
- Stainless steel
- Cast iron
- Aluminum and alloys
